Mosaic Turtle

1

First turn the plate upside down – you will turn this upside down plate into a turtle shell!

2

Apply glue and decorate with tissue paper. Get creative using different colours to make a fun mosaic pattern.

3

Next, cut out four little turtle legs, a head, and a tail. Ask an adult if you need help cutting out all of the pieces.

4

Once dry, flip the turtle on its back and attach the four legs, the head, and the tail using white glue.

5

Apply some glue for the googly eyes and make sure to add a smile to your turtles face.

6

Finally, don't forget to give your turtle a name!
